Office Action Summary	Application No. 10/551,557	Applicant(s) TSAKLAKIDIS ET AL.	
	Examiner SUN JAE Y. LOEWE	Art Unit 1626	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Response to Amendment

1. The remarks and amendments to the claims filed on February 26, 2010 have been fully considered. The 35 USC 112 1st paragraph rejection with respect to solvates has been obviated and is thus hereby withdrawn. The obviousness-type double patenting rejection for US 7,504,500 is withdrawn in view of Applicant's remarks that the claimed process in the patent is drawn to different intermediates/starting materials relative to the instant process claims.

2. The 35 USC 112 1st paragraph enablement rejection for method of use is maintained. Applicant has argued that the rejection is in error because mere unpredictability as well as lack of working examples does not render experimentation undue for enablement. This argument has been considered, however, it is not found to be persuasive. The specification discloses an in vitro activity of the instant compounds as Factor Xa inhibitors. The specification does not provide any additional disclosure in support for the method of treating diseases. Thus, one must look for support for the claimed methods in the current state of the art. It has been stated that there is no established correlation between in vitro Factor Xa inhibition and the treatment of diseases. Furthermore, the treatment of the diseases claimed is unpredictable, as provided in the office action. Therefore, due to the lack of a correlation, in view of the unpredictability in the art, and the lack of working examples or guidance in the specification a determination was made that the claims are not enabled. This determination is still viewed to be proper. Applicant is invited to provide information

Art Unit: 1626

showing that the instant compounds are active for the process claimed, or provide information as to Factor Xa inhibitors that are known in the art for the treatment of the claimed diseases.

3. The obviousness type double patenting rejection over US 11/576,207 is maintained because the generic claims remain rejected.

Conclusion

4. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
